Business Analyst

Business analyst finishing an MSc in Data Science at GISMA in December 2026, after eight years owning purchasing, pricing and stock decisions. Turns business questions into analysis people act on: repricing **55.7% of a catalogue** from elasticity models, KPI dashboards for non-technical stakeholders across **3 divisions**, and funnel and payments reporting. Works in Agile teams with Jira. Available full-time in Berlin from **December 2026**.

Skills

Business analysis	Requirements management, stakeholder communication, KPI dashboards and reporting, Agile (Scrum, Kanban), Jira, documented and reproducible analysis
Charts & reporting	Power BI / DAX, Plotly, Matplotlib, Streamlit dashboards, Jinja2 HTML reports, automated KPI reports, Excel, Tally
Programming	Python (pandas, NumPy, statsmodels, scikit-learn, XGBoost), SQL (CTEs, window functions), DuckDB, MySQL, SQLite
Methods	Price elasticity and regression, A/B testing, RFM segmentation, funnel analysis (CAC, CVR), demand forecasting (ARIMA, Prophet), model evaluation (MAE, RMSE, MAPE)
Languages	English (C1), German (A2, improving), Hindi (native)

Experience

Data Science Intern Aug 2026 – Present
KnowGuard AI *Berlin, Germany*

- Ran a **paired A/B test on AWS** comparing a fine-tuned model against the review arm: **+0.0318 AUPRC** (95% CI 0.022–0.0418), below the pre-set 0.05 practical-effect threshold
- Defined evaluation metrics and hold-out sets, and set the **practical-effect threshold before testing**, so a statistically positive result was still called correctly as not worth shipping

Operations & Supply Chain Analyst Mar 2024 – Jul 2025
Troika International Pvt. Ltd. *Panchkula, India*

- Worked directly with operations and supply-chain stakeholders to turn recurring questions into **standing reports**
- Built **Power BI dashboards across 3 divisions**, turning operational data into clear views for non-technical stakeholders
- Monitored inventory and demand across **700+ vendors** and **500+ SKUs** in Tally and Excel
- Rescued a stalled **₹2.75M export order** (500 units to Lithuania) by moving the shipment to **air freight** to hold the delivery window and renegotiating terms with the client

Business Manager Nov 2015 – Jan 2024
Bhatia Traders *India*

- Ran a product business end to end for **8 years**, owning purchasing, pricing, stock and supplier terms across **20+ suppliers**
- Analysis-led changes cut **excess-inventory cost by 10%** and identified a **~15% stockout-reduction** potential
- Ran three ventures alongside it: a **home-tutoring marketplace**, **Shopify e-commerce stores** and a restaurant

Education

GISMA University of Applied Sciences Potsdam, Germany
MSc Data Science, AI & Digital Business *Sep 2025 – Dec 2026 (expected)*

- Thesis: the US–Iran conflict's impact on the German electricity market

University College of Engineering, Patiala *B.Tech, Civil Engineering, 2011 – 2015*

Selected Projects

Dynamic Pricing & Segmentation *Python, statsmodels, XGBoost, Plotly* Source

- Estimated **price elasticity per category** with log-log OLS on 15,000 SKUs in 8 categories (e.g. Fashion −2.1, Food & Beverages −0.5)
- Segmented customers with **RFM scoring**; 6 business rules + XGBoost repriced **55.7% of the catalogue** (8,352 SKUs), and an XGBoost price recommender reached **2.14% MAPE**

Payments BI Dashboard *Power BI, DAX, Python, star schema* Source

- Built a 3-page **Power BI** dashboard over **100K payment transactions** ($15.99M revenue) covering BNPL share, delivery performance and revenue mix with **DAX** measures

Marketing Funnel Dashboard *Python, SQLite, Matplotlib* Source

- Tracked impressions to clicks to leads to customers with **CAC and CVR per channel** across 5 channels and 52 weeks, in SQL plus a Python dashboard

Demand Forecasting Engine *Python, ARIMA, Prophet, XGBoost, Streamlit* Source

- Compared ARIMA, Prophet and XGBoost on 5 years of weekly sales for 12 SKUs on a 12-week hold-out; **Prophet best at 6.07% MAPE** vs. 15.49% for ARIMA
- Shipped as a Streamlit app where a planner picks SKU, model and horizon and sees MAE/RMSE/MAPE live

Odd-Jobs Aggregator for Students *Multi-source ingestion, dedup, LLM drafting* Private repo

- Built a **multi-source aggregator** collecting listings posted in the last **24 hours** across Kleinanzeigen, Craigslist and further pluggable sources, for students who cannot search them by hand
- Generates the message and a tailored CV per listing, then applies once the user approves a shortlist. **Human-in-the-loop** by design

BI Data-Quality Pipeline *Python, pandas, NumPy* Source

- Automated **45 validation checks** (missing values, duplicates, referential integrity, outliers, row counts) across a 7-table star schema; **41/45 passed (91.1%)**
- Traced two silent data losses (614 payment rows, 551 review rows) to root cause and documented fixes in an auto-generated report

MSc Thesis: Conflict Shocks in the German Power Market *Python, Chronos, XGBoost, Granger causality* Source

- Built a reproducible pipeline answering **5 research questions** on how the 2026 US–Iran conflict moved German day-ahead electricity prices, benchmarked against the 2022 energy shock
- Combined **event study**, **Granger causality** and ablation tests with **Chronos** and XGBoost forecast arms to identify the transmission channel

Job-Search Automation: agent harness *Scheduled agents, shared database, Python, GitHub* Private repo

- Built a versioned system of **four scheduled agent tasks** (sourcing, outreach, daily report, LinkedIn drafts) that hand work to each other through a **shared database**
- Sourced roles from ATS and Arbeitsagentur feeds, government portals and job boards across **12 countries**, plus funding news for startups

Bhatia Traders Sales Analysis *Python, pandas, Matplotlib* Source

- Analysed Bhatia Traders sales with moving averages and a margin ranking by product, and sized a **~15% stockout-reduction** potential
- The demand patterns it surfaced became the basis of the Demand Forecasting Engine

Certifications

- **Introduction to Data Engineering with Microsoft Azure 1 & 2**, FutureLearn, Sep 2026
- **Introduction to Cloud Infrastructure: Describe Cloud Concepts**, Microsoft, Jul 2026
- **Data Analytics Job Simulation**, Deloitte, issued by Forage, Jul 2026
